## Recommendations:

- 1. See the relevant ЦПАР for maximum permissable input signal power in the bandwidth.
- 2. Input signal amplitude in the stop band is limited to 5 V.
- Input signal amplitude in the stop band is limited to 5 V.
  DC voltage at the input (output) of the filter should not exceed 10 V.
- 4. It is recommended to include the coupling capacitor between the device and the generator (load).
- 5. SAW filters are sensitive to static electricity, therefore corresponding precautions should be taken while working with them.
- 6. Do not expose the device to frequency vibrations more than 5 kHz. Do not use ultrasonic cleaners.
